Decrease in High Levels of Heavy Metals Reported when Treating with NDF™.

Los Angeles, CA - Using DMPS as the provocation agent for pre- and post-urine challenge, the following laboratory results were observed: Female patient, 43 years, began using NDF™ as her heavy metal detoxification dietary supplement. Previously she had been taking chemical chelators for over a one-year period with no change in her Doctors Data Lab report. Patient started on NDF at 6 drops, 2x per day, ramping up the dose to her top tolerated dose of 2 mls (52 drops), 2x per day. The reports below show her success in lowering her heavy metal loads over a seven-month period with no aggravations.

Baseline DMPS Challenge from Doctors Data shows:

Mercury	140	< 3	
Bismuth	84	< 30	
Arsenic	72	<100	

Follow up DMPS Challenge from Doctors Data shows patient's decrease in Heavy Metal load:

Mercury	26	<3	
Bismuth	<DL	< 30	
Arsenic	56	<100	

Patient reports: "I have an increase in energy and mental function that I haven't experienced in over 20 years - no more 'foggy brain'; head pain and dizziness are gone. Uncomfortable GI symptoms have decreased dramatically. NDF™ works."*

Complete versions of the labs summarized here are available at: www.bioraynaturaldetox.com.

"NDF provides safety and effectiveness for my patients. From young to elderly patients, all have reduced their toxic load significantly and experienced no side effects during their detox protocol."

Dr. Marc Davidson, D.O., L.Ac.
